

Protecting businesses worldwide

**Powerful. Fast. Simple.**

In the face of increasingly complex threats targeted at small and medium businesses, cybersecurity must be quicker, smarter, and more reliable than ever. Yesterday's methods are no longer enough.

**Meet Avast Business.**

## Powerful security solutions for the modern business.

Avast Business provides easy-to-manage, enterprise-grade security and network management solutions for SMBs and IT service providers. Backed by the largest, most globally dispersed threat detection network, the Avast Business security portfolio makes securing, managing, and monitoring complex IT environments easy and affordable.

Our unique combination of security and remote monitoring and management expertise means we can deliver integrated solutions that are faster, smarter, and more powerful than ever. The result is superior protection that businesses can count on.

## Security for SMBs is now more critical than ever

**Three in five** SMBs have experienced a cyberattack in the last 12 months.

**40 percent** of infections spread to multiple endpoints throughout the network.

Among businesses that suffered a breach, **20 percent** had to cease business operations immediately and **12 percent** lost revenue.

## Endpoint Protection Solutions for SMBs

All-in-one protection for devices, data, and people.

Avast Business Endpoint Protection Solutions provide a range of award-winning antivirus protection, so businesses can run smoothly and efficiently, without interruption. The portfolio consists of three products: Antivirus, Antivirus Pro, and Antivirus Pro Plus—all designed to keep your customers' devices, data, and employees safe from the latest cyberthreats.

All three solutions may be used standalone or centrally managed by either an on-premise or cloud-based console for increased ease of use. The console makes it easy to deploy antivirus protection to multiple devices, manage all devices from one place, schedule regular scans, and quickly add more devices.

## Managed Services Solutions for IT Service Providers

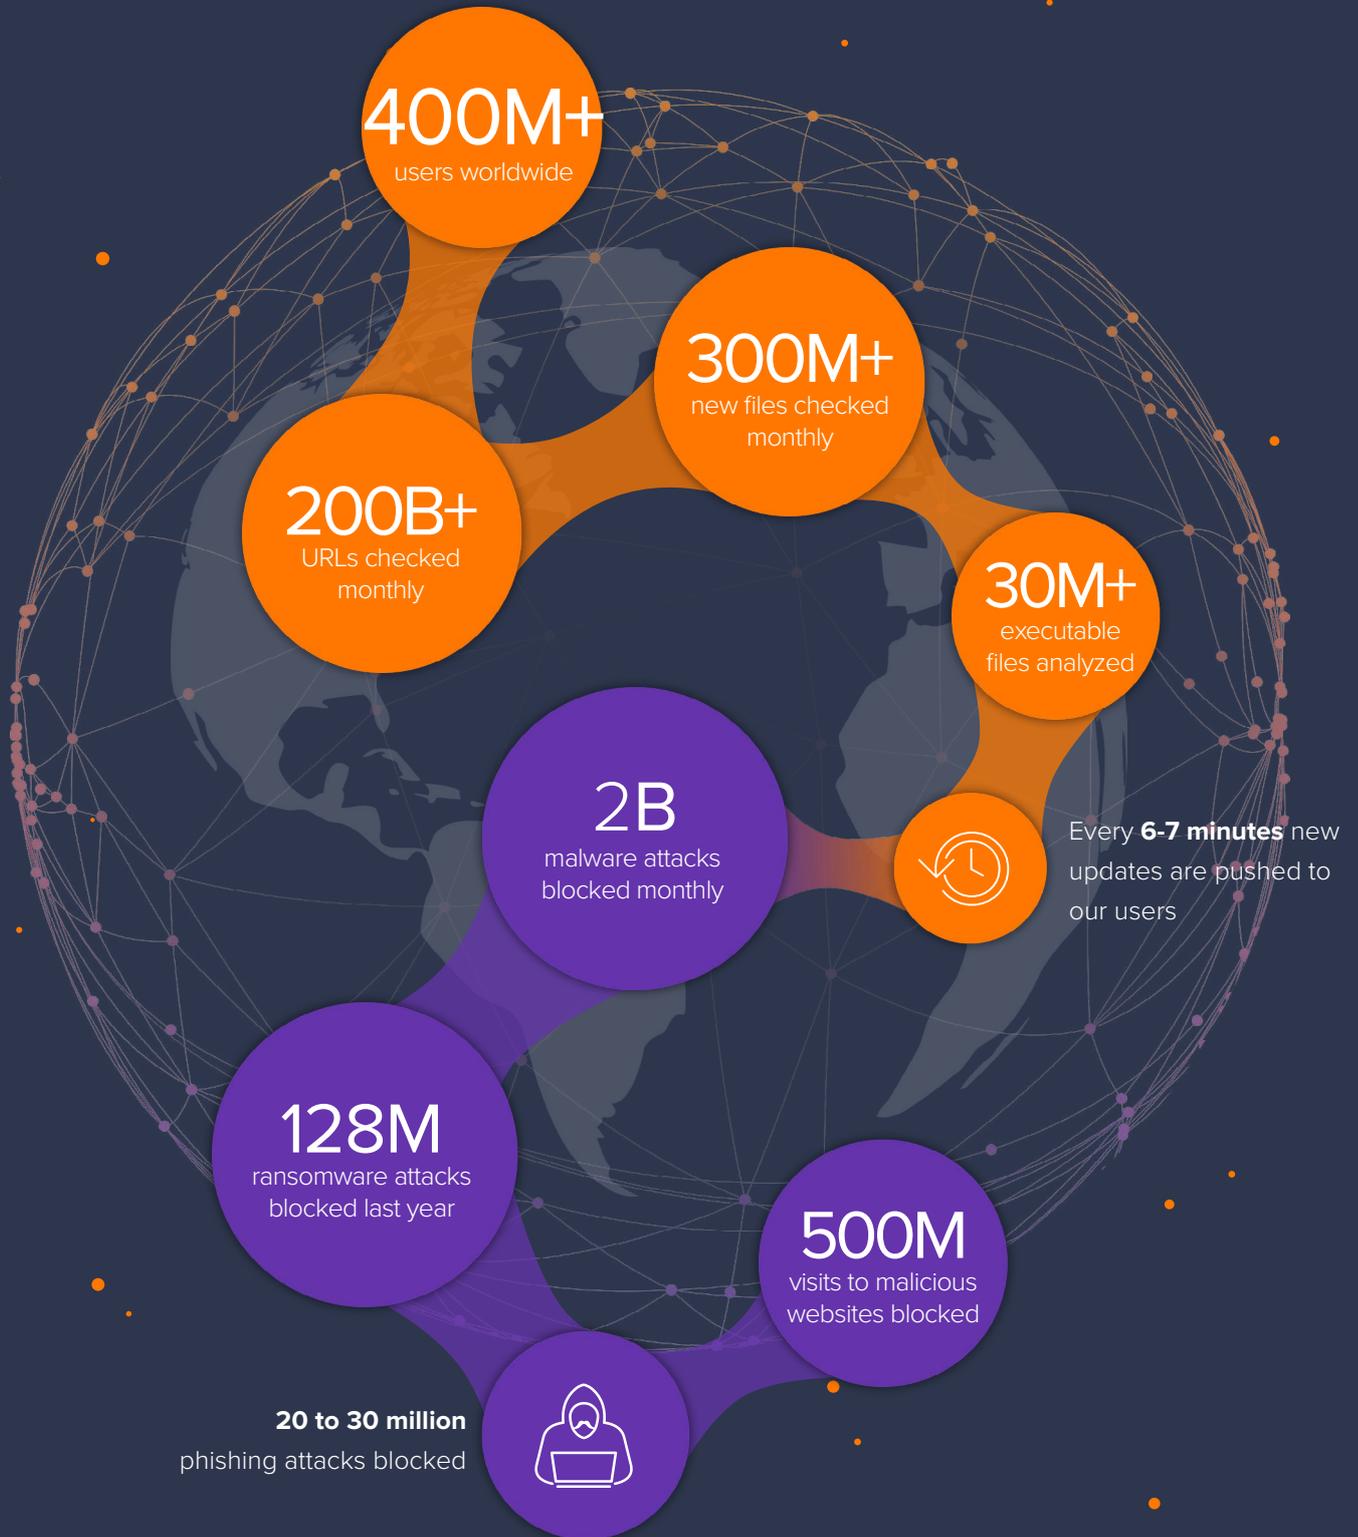

Powerful, security-focused remote monitoring and management.

Avast Business Managed Services Solutions help IT service providers deliver remote security and network management services to their customers—giving them peace of mind in a changing threat landscape while helping IT service providers grow their business. The portfolio consists of two products: CloudCare, a cloud-based security portal, and Managed Workplace, a full-stack, remote monitoring and management platform with a built-in security engine.

With CloudCare, IT service providers can remotely deliver layered protection to multiple clients with pay-as-you-go security services, such as antivirus, content filtering, and backup services. Managed Workplace brings a cost-effective, multi-tenant security lens to remote monitoring and management that allows MSPs to quickly assess vulnerabilities, secure weak points, monitor anomalies, and seamlessly recover data in the event of an attack.

# Detect. Diagnose. Destroy.

# Why Avast Business?

---

## World's Largest Threat Detection Network

Our hundreds of millions connected users provide a continual stream of data that helps us quickly identify and destroy any threat—and predict future ones. Day and night, across the globe, our immense cloud-based, machine-learning engine is evolving and learning, making our solutions smarter, faster, and growing more powerful by the second.

## Brilliant Security Professionals

Our engineers, data analysts, and ethical hackers are from some of the most highly respected institutions, including Stanford, MIT, Oxford, and NASA. Their talent and experience is matched only by their passion for stopping threats. Add to this our big data, deep threat inspection technology, and AI capabilities, and you get powerful, enterprise-grade protection.

## Security-Focused Remote Monitoring and Management

Integrated antivirus and assessment tools allow IT service providers to easily measure the security of their SMB customers, quickly recommend solutions, and take actionable steps to remediate security risks – all from a single dashboard. Having a cost-effective, built-in security service helps MSPs grow their business, differentiate their services, and become their customers' trusted advisor.

## Comprehensive Partner Program

Avast Business partners get exclusive access to an award-winning product portfolio from one of the world's most recognized names in security. Whether you're looking for endpoint protection products or complete network management, our partner program provides all the training, sales assets, and competitive information you need to succeed and grow your business.

## About Avast Business

Avast Business is part of Avast, one of the world's largest security companies. Avast has been saving the world from cyberattacks since 1988 with our innovative solutions, deep expertise, and the world's most advanced threat detection network.
