# LiveTiles | Your digital workplace

Touch the New World of Work

Software for the digital workplace

LiveTiles gives today's dynamic teams the ability to work smoothly across devices, between departments and beyond time zones. Our products provide the #1 platform to build digital workplaces, including modern UX focused solutions for competitive companies of all sizes, from every industry. Join us in equipping businesses for the digital transformation. Farewell to archaic 9-5 workdays and welcome to the fluid new world of work.

LiveTiles software empowers users with the ability to surface and organize scattered business apps, resources, files and more on a single pane of glass over Office 365, SharePoint and Azure. Products include LiveTiles Design, Build and Blueprint; LiveTiles Mosaic for education, free to K-12 schools; soon-to-be released Azure product, LiveTiles Cloud.

Sharpen Business Solutions

Unveil Office 365 & SharePoint and awe users with an exciting, tailored experience. Available for teams on SP 2010, 2013 & 2016.
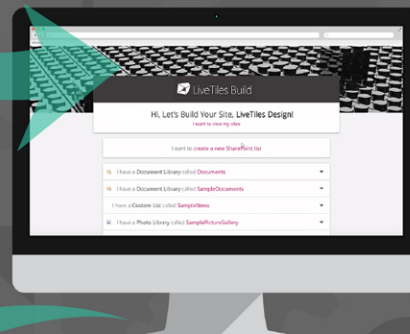

Design

Give teams the polished UI and impressive UX they can't walk away from

- **Integrate endless business apps**, organize scattered files and surface resources with the #1 software to create beautiful digital workplaces—in a single day
- **Pre-configured, drag-and-drop tiles** for every purpose, it's the ultimate one-stop shop for all coding needs

Build

A complex structure of information architecture (IA) is behind that stunning UI made with LiveTiles Design

- **Simple statements automatically build out site collections, lists and libraries** and allow IT departments, dev teams and SharePoint administrators to glide through backend IA like a pro
- **Manage SharePoint infrastructure** with precision, speed and ease

Blueprint

Replicate the finest UI templates created in LiveTiles Design and share master IA developed in LiveTiles Build

- **One-click SharePoint deployment** gives users a consistent, smooth experience every site, every time
- **Instantly share sites and IA** across multiple tenants, sites and site collections and skip through generating large-scale IA
