

Timus Network Takes Home 5 Awards for Innovative Approach to Cybersecurity

Three gold medals in the 2023 Cybersecurity Excellence Awards as well as 2 more prizes in the Globee Cybersecurity Awards reflect the tech firm's commitment to providing "comprehensive and cost-effective solutions for businesses of all types and sizes," COO says

Cambridge, Massachusetts - At this year's Cybersecurity Excellence Awards, [Timus Networks](#) received the Gold Medal for "Most Innovative Cybersecurity Company." The firm also took home the gold in the "Zero Trust Security" and "Cybersecurity-as-a-Service" categories.

Additionally at the Globee Cybersecurity Awards, which were held earlier this week, it won the silver prize for "Artificial Intelligence in Security." The pioneering Boston-based tech firm also took home the bronze prize in the "Zero Trust Security" category. Winners at this year's Globee Awards will be honored at a virtual ceremony to be held in May.

"We're grateful to our amazing team, valuable partners, and loyal customers, all of whom helped us get where we are today," Timus COO Hakan Hintoglu says.

[The Cybersecurity Excellence Awards](#) is an annual competition honoring individuals and companies that demonstrate excellence, innovation and leadership in cybersecurity.

Held every year, the GLOBEE Awards recognize IT firms that produce groundbreaking cybersecurity solutions and services. The awards cover a wide range of categories, including data privacy, cloud security, and threat detection, among a number of others.

Award-Winning Cybersecurity Solutions

An innovative cloud-based platform, **Timus** lets businesses manage network security through a single, easy-to-use interface. Taking an all-in-one approach to cybersecurity, Timus offers a subscription-based model that reduces the need for outdated hardware-based technologies.

“In today’s rapidly evolving digital landscape, where novel threats emerge on an almost daily basis, cybersecurity has never been so important,” Hintoglu says. “These awards reflect our continued commitment to providing comprehensive and cost-effective solutions for businesses of all types and sizes.”

‘Optimal Protection against Unforeseen Threats’

Being the go-to choice for 15 thousand of customers worldwide and protecting more than 1 million users globally, **Timus** is an all-in-one Saas product designed to meet all the security needs of the hybrid workplace for small & mid-sized businesses. It provides a wide range of cutting-edge cybersecurity tools and services, thus eliminating the need for large IT teams.

Timus also lets businesses optimize workflows by securely linking employees, devices, and applications – wherever they are on the planet. This is of crucial importance in the post-pandemic era, where remote working has become commonplace.

“With Timus, businesses can manage their remote-access processes, cloud connectivity, and threat prevention from a single platform,” Hintoglu explains. “Its AI-driven security solutions, meanwhile, ensure optimal protection against unforeseen threats.”

“We’re honored to have been recognized for our unique approach to cybersecurity,” he adds. “Timus remains dedicated – more than ever – to providing customers with the very best cybersecurity solutions available.”
