

For Immediate Release

Webroot and Tech Data Partner to Deliver Real-time, Collective Threat Intelligence through Expanded Cybersecurity Capabilities

Designed for MSPs and Resellers Transitioning to Managed Services, Webroot offers Smart, Easy-to-deploy and Highly Effective Endpoint Protection through Tech Data Solutions Store

BROOMFIELD, CO – Oct. 28, 2015 – [Webroot](#), the market leader in intelligent cybersecurity for endpoints and collective threat intelligence, today announced a strategic agreement with [Tech Data Corporation](#) (NASDAQ: TECD). Under the terms of the agreement, Tech Data is offering MSPs, solution providers and partners in the U.S. the opportunity to easily purchase, deploy and manage Webroot's intelligent endpoint protection and real-time, collective threat intelligence to its customers.

Tech Data, one of the world's largest IT distributors, is expanding its product portfolio with [Webroot SecureAnywhere® Business Endpoint Protection](#) with [Global Site Manager](#) through the company's award-winning Tech Data StreamOne® Solutions Store. Cloud-based Webroot SecureAnywhere Business Endpoint Protection offers the channel and MSP community better protection and performance alongside increased operating margins, reducing complexities associated with managing traditional security solutions.

"Webroot offers our channel of MSPs and solution providers an easy-to-deploy and highly effective next-generation endpoint protection," said Stacy Nethercoat, vice president, Tech Data Cloud. "Along with Tech Data's best-in-class team of cloud security experts, Webroot's solutions provide lower operational costs and improved productivity. The cloud-based approach benefits solution providers through competitive margins and a recurring revenue model that makes for a cost-effective global management experience."

Customers leveraging Webroot SecureAnywhere Business Endpoint Protection with the Global Site Manager console benefit from:

- Real-time, cloud-predictive Windows & OSX malware protection
- Secure web browsing with identity & privacy shield
- Feature-rich, web-based management console that supports large deployments
- Simple one-click support

"The partnership with Tech Data underscores Webroot's commitment to the channel and MSP community and supports their desire for flexibility when purchasing Webroot solutions," said Charles Tomeo, vice president of worldwide channel and technical sales at Webroot. "With such a significant increase in cybersecurity incidents, MSPs and businesses are ramping up internet security efforts and are quickly adopting cloud-based Webroot security to easily deploy and manage endpoint protection across multiple domains, devices, customers, and offices from a single, centralized console in a single-pane view."

Webroot's highly scalable Global Site Manager gives MSPs and resellers a hierarchical view of the endpoints under their protection, allowing them to go from a global view of their customers down to group and individual user views. This more efficient and structured way of managing complex, multi-site

deployments enables MSPs and resellers to view in real time the number of devices deployed by each customer and whether those endpoints need attention.

Partnering with companies around the globe, Webroot provides MSPs, resellers, and systems integrators enhanced privacy, performance, and protection through exclusive partner programs. To learn more, visit www.webroot.com/us/en/partners.

About Tech Data
