

ZEROSPAM: DEADLY ACCURATE AND UTTERLY SIMPLE CLOUD EMAIL SECURITY

ZEROSPAM delivers the kind of **performance** you expect from high-end solutions and the level of **security** you need for peace of mind. It builds a **solid wall of defense** against **all email-borne threats** while using none of your **internal resources** so you can concentrate on your business. Using ZEROSPAM means **minimal management time** and efficient **protection from your own users**. With ZEROSPAM, you don't have to worry about the possibility of losing email or seeing your email communications come to an **abrupt halt**. It provides the reassurance of dealing with an **agile, service-oriented supplier** for your most critical communication application.

SECURITY

- Two antivirus agents
- Special anti-phishing layer
- High detection of executable files
- TLS is fully supported
- Vast high-availability network of failover servers
- LDAP synchronization and single sign-on
- Full audit of key transactions
- Free monitoring of client gateways

PERFORMANCE

- VBS spam proven catch rate of 99.9% and FP rate of 1/10,000
- Email transmission delay: < 2 seconds
- Quick implementation of new measures against Zero-day threats to bridge the gap until virus signatures are updated.

SAVES INTERNAL RESOURCES

- Does not run on your infrastructures
- Requires no machine, no space, no electricity
- No optimization, no updates
- Lightens the load on your IT staff
- Prevents spam from wasting your bandwidth

PROTECTION FROM YOUR USERS

- Individual quarantines in self-subscribe or manual creation mode
- All executable files are automatically quarantined
- Detailed virus reporting
- Messages must be released from web interface

COMPLETE PROTECTION

- Eliminates viruses
- Detects spam, malicious URLs and worms
- Protects against malware, phishing and harmful attachments
- Protects against DDoS and targeted attacks

SOLID WALL OF DEFENSE

- Network perimeter is protected
- Spam and viruses are eliminated in the cloud
- Attacks are dealt with in the cloud and go unnoticed by customers
- Inbound messages come from a single trusted source
- Your IP address is no longer visible

NO ABRUPT HALT

- Availability is 99.999%
- 5 days free queuing if client server is down
- Email continuity can be set up as required
- Outbound filtering protects against infections leading to blacklisting

MINIMAL MANAGEMENT TIME

- 90% of spam detected at the envelope level
- Lighter, easier to manage quarantines
- Highly intuitive client interface
- Less email-related helpdesk requests
- Automatic relearning based on user feedback
- Simple yearly declarative licensing

AGILE, SERVICE-ORIENTED SUPPLIER

- 24/7 support
- No call queue, no forms to fill out
- Provided by trained and competent email specialists
- Proactive notifications
- Free help with SPF, DNS and DMARC issues
