NSOC

BECOME A SECURITY HERO TO YOUR CLIENTS

INTRODUCING ONE STOP SOC FROM inSOC

ONE STOP SOC

VULNERABILITY SCANNING BUILT IN

A turnkey managed security solution, specifically designed for MSPs and IT service providers, enabling you to:

/// Deliver operational efficiencies

/// Dramatically reduce breach detection costs

/// Speed up the detection of large scale cyber breaches

| Detect | Investigate | Respond | Report |

As an MSP you have a great opportunity to offer security services to your clients

But it's not easy to do this in-house:

/// Expensive to set up and staff an in-house SOC

/// Challenging to recruit and keep experienced security analysts

/// Difficult to identify/costly to invest in effective SIEM and vulnerability detection tools

/// 24/7/365 monitoring, detection, mitigation and remediation required

/// Ever increasing regulatory pressure

AI DRIVEN PLATFORM

BASED ON A PROVEN TRUSTED FRAMEWORK, WITH 24/7/365 MONITORING BUILT IN

RAPID DEPLOYMENT

It makes sense to partner for SOC. It makes even more sense to partner with inSOC for ONE STOP SOC.

State of the art solution
ONE STOP SOC incorporates a unique AI-driven solution powered by Starlight from Stellar Cyber, combined with sophisticated vulnerability scanning from Rapid7, to protect your clients 24/7/365.

Rapid deployment
A preconfigured appliance accompanied by best-in-class onboarding, with 30 days fine-tuning after installation to reduce noise and get you up and running quickly.

Based on a proven, trusted, framework
As part of the onboarding process, your client environments are hardened to the 20 most critical NIST CSF Security Controls as identified by the CIS.

Compliance
24/7/365 monitoring combined with local assistance to meet specific regulatory requirements, including HIPAA, PCI/DSS, DFARS, ITAR, FISMA and Cyber Essentials.

Specialist SOC team
Your clients are in safe hands, with our specialist team monitoring and responding to alerts 24/7/365.

ENTERPRISE GRADE SOLUTION

HOW DOES ONE STOP SOC WORK?

Install appliance
Depending on the plan selected, we ship physical or virtual appliances to each of your subscribing customer sites and help set them up.

Fire up the software
Thanks to a unique AI-driven detection platform powered by Starlight from Stellar Cyber, and vulnerability scanning from Rapid7, you are now ready to start onboarding your first customers.

Start onboarding your customers
We provide best-in-class onboarding, with plenty of hand-holding for the first 30 days following installation. As part of the onboarding process, our team will help you to set up critical security controls required to comply with the NIST SP 800-171 framework, Cyber Essentials, DFARS regulation and PCI-DSS 3.2.1 regulations.

SOC services start
Once onboarded, we begin to collect critical security logs, perform deep packet inspection and conduct scheduled vulnerability scanning. Plus we start monitoring and acting on alerts 24/7/365.

About inSOC

Backed by many years of collective experience in the MSP space, inSOC enables MSPs to offer layered security services to their customers as an additional revenue generator – without the challenge of staffing and running an in-house SOC.

inSOC delivers an enterprise-level cybersecurity solution – ONE STOP SOC. It combines a preconfigured, AI-driven detection platform (Starlight from Stellar Cyber) that is quick to onboard and easy to deploy, with sophisticated vulnerability scanning from Rapid7. We also provide wraparound SOC services as part of the package.

With inSOC monitoring their client environments 24/7/365, MSPs and MSSPs can protect customer networks more effectively and help them to meet relevant compliance and regulatory requirements.

We can help you become a security hero to your clients
