Token

Authentication Handled

Introducing an innovative biometric wearable that delivers the strongest MFA with the greatest user convenience
PROXIMITY SECURITY

NFC technology validates the proximity of Token Ring preventing remote attacks.

PASSWORDLESS AUTHENTICATION

The gesture feature allows the user to authenticate only when they intended.

INNOVATIVE WEARABLE

The ring is always with the user, so it is always safe and immediately available.

SECURE CREDENTIALS

User credentials are stored on Token Ring's EAL5+ certified secure element for high security.

BIOMETRIC AUTHENTICATION

Only the user's fingerprint will activate Token Ring meaning no one else can use it.

Token Ring eliminates the risk of a lost or stolen authenticator, vulnerabilities of BYOD devices, and provides the ultimate in user convenience. It works with every IAM solution in the market and can be implemented in less than an hour.

Year after year, cybersecurity researchers report that compromised user credentials are the cause of more than 80% of data breaches and ransomware losses. Token Ring is an innovative and effective way to keep hackers out of any network.

Supports industry standards and integrates with every major IAM provider

Multi-Factor Authentication Comparison

How Token stacks up against other MFA solutions

	Token	SMS	Authenticator Apps	Hardware Keys	Passkeys
Works with Most IAM Solutions	✔	✔	✔	✔	✔
Hard to Lose Wearable Device	✔	✘	✘	✘	✘
No Keys Stored on Remote Servers	✔	✘	✘	✔	✘
No BYOD Vulnerabilities	✔	✘	✘	✘	✘
Biometrically Secured	✔	✘	✘	✘	✘
Support for Passwordless Login	✔	✘	✘	✘	✔
Easy to Implement	✔	✔	✘	✘	✘
No One Time Codes to Enter	✔	✘	✘	✘	✔
FIDO2 Support	✔	✘	✘	✔	✔
